

# THE NEW DIMENSION OF AUTODIAGNOSTICS

## A WORLD WITHIN REACH

You can touch it with your hands! Today, thanks to b-Touch autodiagnosics enters a new dimension allowing to use the tool in a way you would never have imagined.

**DESIGN AND ROBUSTNESS** Stemming from an accurate design, B-Touch is made in materials ensuring utmost solidity for the use in the garage. The body in aluminum and the soft touch side caps are not only good-looking elements but they are suitable to the heavy-duty use of the tool.

**TOUCH SCREEN DISPLAY** thanks to the 7" touch screen, the operator has just to touch the display to make selections quickly and intuitively.

**CAPACITIVE KEYPAD** based on the touch technology concept, it enables a traditional query while providing an extremely rapid operation

## FULLY INTEGRATED TO YOUR PC

Thanks to the WINDOWS - PC automotive technology by Brain Bee – today improved - b-Touch is fully integrated to the functions of your PC so that every operator can use the tools one cannot do without.

Thanks to the **UP&GO** system, the software and the USB connector for the connection to your Scantool, you will avail yourself of a powerful tool for management, storage and consultation of your diagnostic interventions.

Test reports can be printed (also wireless, thanks to the integrated Bluetooth) to be also used to justify the cost of your interventions to your customers.

## COMPREHENSIVE DATABASE – TOTAL MARKET CONTROL

The vehicle database for the tool is the most comprehensive and updatable.

In a single tool a comprehensive database comprising **ASIAN CARS** and **EUROPEAN CARS , COMMERCIAL VEHICLES** included.

The annual update program plans for 5 releases.

The updating is controlled by the annual subscription authorizing to the download of the update as soon as it is available.

Brain Bee offers several options of subscription to personalize your choice as much as possible.

## IMMEDIATE DATA UPDATE

With **UP&GO** system installed on your PC, all periodical updates are immediately identified upon their release, they can be downloaded in 4 minutes only (\*) and made immediately available for the tool update.

(\*) average update download time in case of connection via a high rate line

Registration also entitles to enjoy **UP&GO EXCLUSIVE ADVANTAGES**

- 1. SPECIAL SEARCH FUNCTIONS** – devoted exclusively to those adhering to the program.
- 2. PERSONNALISATION** of the tool display and of the print-out report with the entry of the GARAGE name.
- 3. PROMOTIONS** specially conceived for the UP&GO users

## **TECHNICAL FEATURES**

Multi-make tool for the diagnostics of electronic systems on board of the vehicle

Connections .....	diagnostic connector D SUB 15-pole socket - USB Fast-Speed V2.0
Wireless connection.....	Bluetooth V2.0 with 100m range in free field
Internal cache memory .....	64Mb DDR RAM, 128Mb FLASH, 2Gb microSD or higher
Keypad .....	capacitive 6 buttons QTouch
Display .....	TFT 7" 800x480 with 262144 colors with touch screen.
Diagnostic lines Multiplexer: .....	Integrated electronic switch with current protection
Power supply from vehicle battery.....	8-35VDC
Battery: .....	7,4V 2200mAh Li-Ion integrated battery pack, rechargeable - autonomy: 3 hours
Operating temperature.....	0°C / +45°C
Power .....	12 W max
Dimensions .....	315x220x55 mm ( L x H x P )
Weight .....	1500 g

Update via PC

## **COMMUNICATION PROTOCOLS**

ISO 14230 (ISO 9141-2), ISO 11519 - J1850 PWM,	RS485 (SAE J1708),
ISO 11519 - J1850 VPW, ISO 11898-2 - HIGH SPEED CAN-BUS,	SAE J2610.
ISO 11898-3 - LOW SPEED CAN-BUS,	BLINK CODE
SAE J2411 - SINGLE WIRE CAN-BUS,	SAE J2534 Pass-Thru-compliant.

## **STANDARD SALE CONFIGURATION:**

B-TOUCH ST-9000  
USB A-B CABLE  
EOBD DIAGNOSTIC CABLE 1,5 mt  
Integrated UP&GO  
BATTERY CHARGER

## **OPTIONAL ACCESSORIES:**

In order to make your B-TOUCH the right tool at every moment:

- Cable for EUROBAG adapters
- EUROBAG – set of cables for European cars
- Cleaning set
- Multi-function Support
