

DPS300

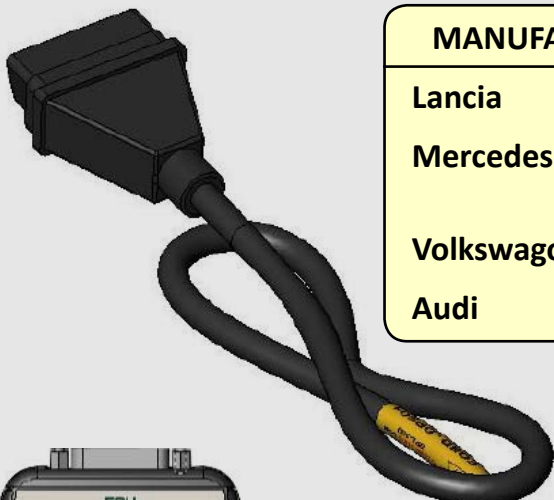

DISC PAD SERVICE TOOL

TECHNICAL SPECIFICATION

The DPS-300 is a valuable service tool for the maintenance of electronically controlled braking systems. Increasingly more common in all markets, some vehicles require intervention into the ECU in order to release the brake calipers allowing service on brake pads and discs.

The new DPS-300 does just that. A stand-alone tool that simply connects to the EOBD socket of the vehicle, and by following a small procedure with the press of a few buttons, the ECU is instructed to enable brake service work to be carried out.

DPS-300 is a compact and lightweight tool that is completely portable. It's current vehicle coverage is shown below.

MANUFACTURER	MODEL
Lancia	Thesis
Mercedes Benz	(ISO) CLS219 - SL230 - E211 - S221 (CAN) CLS219 - SL230 - E211 - S221
Volkswagon	Passat '06 - A6 '06 - Golf V
